When the UL Leaf Mark is on the product, or when the word "Environment" is included in the UL Mark, please search the [UL Environment database](#) for additional information regarding this product's certification.

The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL's Follow-Up Service. Only those products bearing the UL Mark should be considered to be Listed and covered under UL's Follow-Up Service. Always look for the Mark on the product.

UL permits the reproduction of the material contained in the Online Certification Directory subject to the following conditions: 1. The Guide Information, Designs and/or Listings (files) must be presented in their entirety and in a non-misleading manner, without any manipulation of the data (or drawings). 2. The statement "Reprinted from the Online Certifications Directory with permission from UL" must appear adjacent to the extracted material. In addition, the reprinted material must include a copyright notice in the following format: "© 2013 UL LLC".

Floor-coating and -Finishing Materials

[Guide Information for Building Materials](#)

GENERAL

This category covers floor-coating and -finishing materials in four classes:

Floor-treatment Materials (FTM) are (1) water-based materials, (2) fillers, sealers, varnishes, and similar materials, (3) detergents, (4) abrasive grit-bearing liquids, (5) waxes other than water-based, and (6) sweeping compounds intended to be applied to smooth, flat surfaces.

Floor-graphic Materials (FGM) are polymeric films that typically have an adhesive backing and are intended to be bonded to smooth, flat floor surfaces.

Floor-covering Materials (FCM), consisting of wood and composition materials, are treated or inherently exhibit properties intended to preclude the use of wax, polish or cleaners, except as specifically recommended by the manufacturer as indicated in the individual Classifications.

Walkway Construction Materials (WCM) include floor plates and stair treads made of (1) natural stone, (2) composition, (3) abrasive grit surface materials, or (4) metal.

These materials have been Classified as to slip resistance only and found to have slip-resistance characteristics when tested dry of not less than 0.5 as determined by the Static Friction Test Method of UL.

RELATED PRODUCTS

Floor-covering materials investigated in accordance with ANSI/ASTM E648, "Standard Test Method for Critical Radiant Flux of Floor-Covering Systems Using a Radiant Heat Energy Source," are covered under Floor Covering Materials ([IMLS](#)).

Floor-treatment materials investigated as to their fire hazard in accordance with [UL 340](#), "Tests for Comparative Flammability of Liquids," are covered under Polishing and Dusting Materials ([QOJR](#)).

Nonmetallic walkway grates investigated for load-carrying capacity, surface-burning characteristics and slip resistance are covered under Walkway Grates, Nonmetallic ([VZKY](#)).

ADDITIONAL INFORMATION

For additional information, see Building Materials ([AABM](#)).

REQUIREMENTS

The basic standard used to investigate products in this category is [UL 410](#), "Slip Resistance of Floor Surface Materials."

UL MARK

The Classification Mark of UL on the product container is the only method provided by UL to identify products manufactured under its Classification and Follow-Up Service. The Classification Mark for these products includes the UL symbol, the word "CLASSIFIED" above the UL symbol (as illustrated in the Introduction of this Directory), and the following additional information:

*** FLOOR COATING AND FINISHING MATERIAL
AS TO SLIP RESISTANCE ONLY
Control No.**

or

**** FLOOR COATING AND FINISHING MATERIAL
WHEN USED WITH COMPONENT +
AS TO SLIP RESISTANCE ONLY
Control No.**

or

***** FLOOR COATING AND FINISHING MATERIAL
WHEN USED WITH COMPONENT ++
AS TO SLIP RESISTANCE ONLY
Control No.**

* This Marking is to be used when product is shipped in premixed form

** , *** These Markings are to be used when product is shipped in ingredient form

+ Substitute with complete name of ingredient "A"

++ Substitute with complete name of ingredient "B"

Note: Use Marking ** on containers of ingredient "A," and Marking *** on containers of ingredient "B."
